

Secretary Powell, I would like to express my discontent with the radio lobby's move to limit XM radio from telling traffic and weather. I hate regular radio!! You yourself know what it is all about either FM or AM, all ad's and assholes. Just when I can listen in peace and comfort without intrusive garbage, the representative of FM and AM say it's not fair for those of us who pay for radio to have the latest traffic and weather. If they are so worried about what Xm does, then they should charge their customer base and see how quickly they would have to respond to customer demands like Xm is doing. Petition my ass, they are just worried that there are others like me, who will pay to be left alone and just listen to music of our choice, with NO commercials or Howard Stern's or Rush Limbaugh! Until they put up satellites and broadcast, how do they have a say in anything that someone else is doing with a satellite and a paying customer base? Next they will be upset that I have ONSTAR and can get navigation through traffic requests live! Wait, I get it, maybe it's a safety issue. No driving without commercials! Too much concentration on the road!! :)
